

Transform your organization...
with a **100%** coding
efficiency boost!

PLATOCODE[®]

PLATOCODE®

Demand the new benchmark: 100% coding efficiency boost!

Meet your goals with the PLATOCODE Computer-Assisted Coding (CAC) product. This is the world's most advanced medical NLP system, delivering remarkable results with ICD-9, ICD-10 and CPT codes.

You'll see the benefits quickly because the patented PLATO engine does not need your coders to train it. Nor does it rely on arrays of rules. And it can code multiple code-sets all at the same time.

Organizational benefits

Many CAC benefits are quoted but EFFICIENCY is the key that opens all other doors to you. 100% improvement eliminates vacancies, frees up resources and creates opportunities for CDI programs, RAC readiness projects and ICD-10 planning initiatives.

The PLATOCODE company can help there as well: every system comes with a "RAC Pack" to help prepare for Audit. We also know exactly what ICD-10 is about since we've been processing ICD-10 charts since the 1990s.

Savings

When you hit the 100% mark, real money savings start to add up. For example, a typical provider can expect to save between \$1.14 and \$3.66 per SDS case after paying the PLATOCODE fees¹.

We'll even help you measure this using the valid TASK scoring system² that we presented at the AHIMA Convention in 2009.

Recommendation

If you're doing Same-Day Surgery (SDS) coding, that is the quickest way to achieve these benefits. SDS is the most technically difficult coding task because it includes CPT as well as modifiers, NCCI, MUE and LCD.

But usually it already has a good electronic record, making it an excellent target for CAC. Once you free up resources with the 100% efficiency boost in SDS you're in a great position to kick off CDI projects for inpatient records, as well as RAC and ICD-10 readiness projects—ideally without having to find extra budget.

Achieve your Goals

100% efficiency improvement is the PLATOCODE target and we're ready to put our money where our mouth is:

If we deliver less than 100% efficiency improvement we'll reduce our fees to match.

So if we deliver only 17%-30% improvement, you'll pay only 17%-30% of CAC fees.

On this basis, you cannot lose.

¹Based on AHIMA SDS performance standards and 2009 AAPC salary survey.
